Commitments – memberships & important publications

Sustainability reporting at UNIQA

- Between 2017 and 2024, UNIQA published an annual sustainability report in accordance with the relevant GRI standards.
- In 2025, UNIQA published a (Consolidated) Non-Financial Statement for the first time in the Group Management Report in accordance with CSRD/ESRS for the 2024 financial year.

UNIQA Sustainability Strategy & Ambitions

UNIQA 3.0 Growing Impact

Our Vision

UNIQA is the promise for a better life. We will be the best service provider for safety, health and prevention in people's lives.

Our Goal

We want to increase the effectiveness of all our projects and translate the high investments that we will continue to make in the coming years faster and better into customer satisfaction, growth and earnings.

Our Ambition

We want to increase the impact of our projects and translate the high investments that we will continue to make in the coming years faster and better into customer satisfaction, growth and earnings.

Our Guiding Principles

Customer first

We are relentlessly focused on the need of our customers.

Simplicity

We take action and learn from our mistakes.

Ownership

We empower each other to take responsibility.

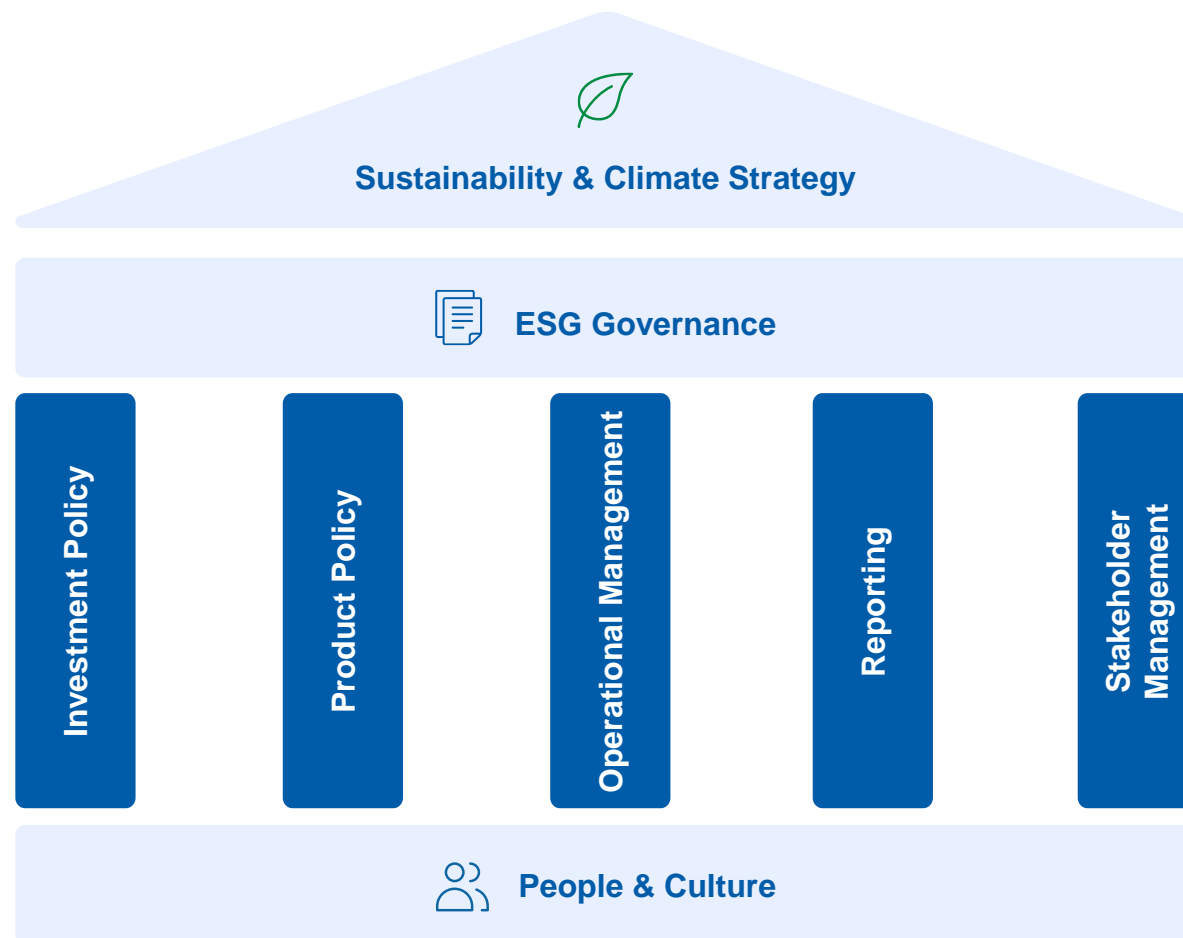

Integrity

We keep our promises

Community

We collaborate beyond conventional boundaries.

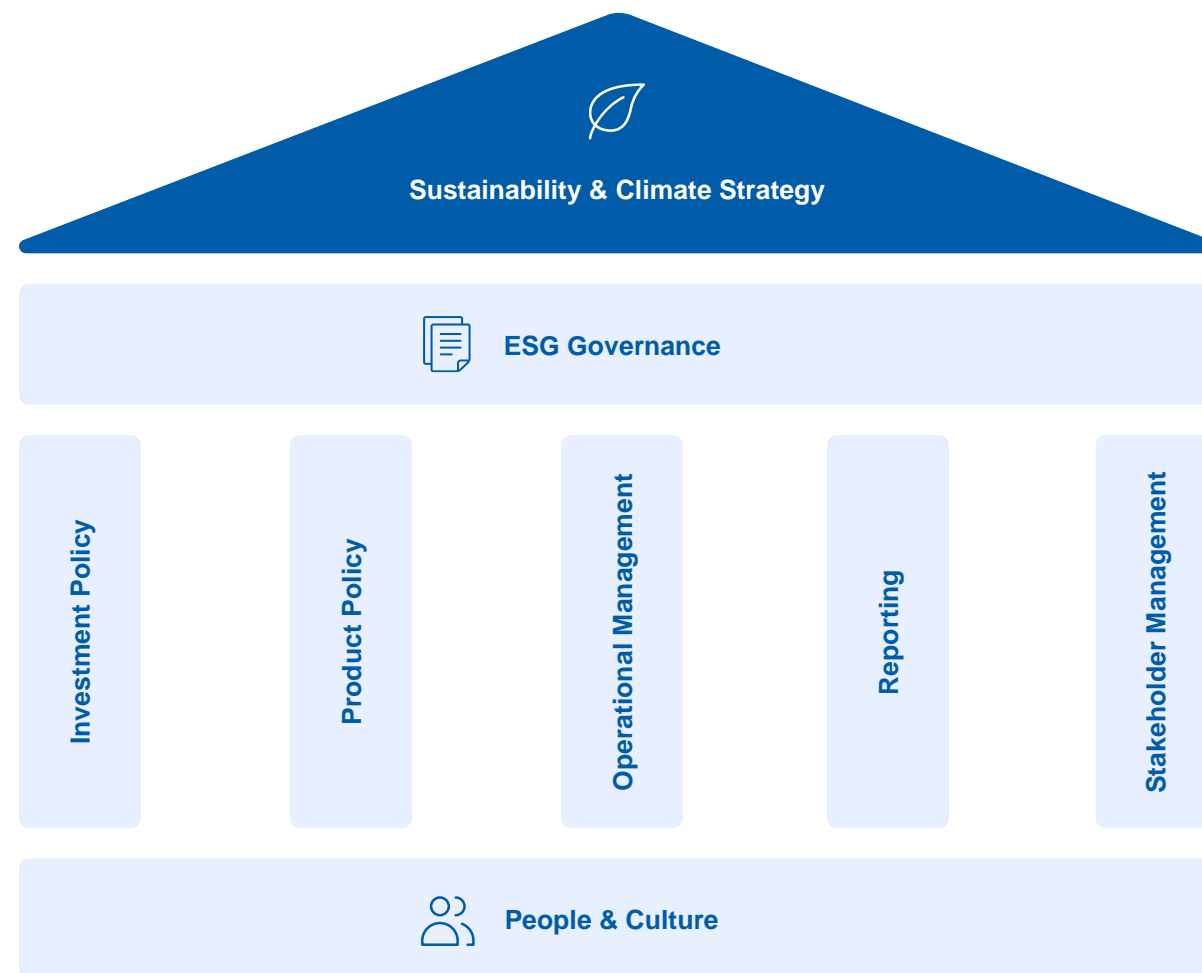

UNIQA Sustainability Strategy

- 1 **Five pillars** build the UNIQA Sustainability Strategy
- 2 Strong **ESG Governance** paves the way for the the five pillars
- 3 **Investment policy** based on ESG criteria
- 4 ESG-oriented **product policy** with sustainable added value
- 5 Exemplary sustainable **operational management**
- 6 Transparent **reporting** and continuous independent **ratings**
- 7 Committed **stakeholder management** for greater social and environmental responsibility
- 8 Building on **people & culture** as a foundation

01

Sustainability & Climate Strategy

Key objectives of the UNIQA Climate Strategy

- Pursuit of the **Paris 1.5°C climate target pathway** in investments, underwriting and operational management, considering the two EU environmental goals of *climate change mitigation* and *climate change adaptation*
- **Net-zero emissions** in the business model by 2040 in Austria (underwriting, own operations) and Group-wide by 2050 (investments, underwriting, own operations)
- Pursuit and realisation of concrete **science-based SBTi interim targets** for 2030
- **Maintaining sustainable investments** at EUR 2 billion until 2025

Commitment to the Paris Agreement

UNIQA has committed to developing and pursuing a climate pathway that is in line with the Paris goals and to achieving **net-zero emissions in Austria by 2040** (underwriting, own operations) and **Group-wide by 2050** (investments, underwriting, own operations).

Driving forward our sustainability ambition in the UNIQA core business:

Investments

Underwriting (corporate customers & retail business)

Operational Management

Net-zero emissions

We define net-zero emissions as

as the reduction of operational GHG emissions (Scope 1, 2 and 3) to zero at best or to a residual level that is compatible with achieving net-zero emissions at global or sectoral level in corresponding scenarios or sector paths within the framework of the 1.5°C target.

Good to know

as the neutralisation of all residual emissions by the net-zero target year and all GHG emissions subsequently released into the atmosphere.

UNIQA on the journey to climate transition

Climate transition plan aligned with CSRD/ESRS

The UNIQA Group is aware that the transition to a net-zero economy requires time, commitment and innovation.

Progress is therefore regularly reviewed and plans and measures are further developed.

A holistic approach combines economic ambitions with a clear ecological and social commitment to the environment and society.

UNIQA Transition Plan

'UNIQA on the journey to climate transition' is a first step towards a transition plan and describes the approach to a comprehensive climate transition. It is a dynamic plan that will evolve with the demands and challenges of the times.

The plan was developed in consultation with the respective divisions, approved by the Executive Board in October 2024 and published in December 2024.

It contributes to the UNIQA Group's holistic approach.

Content

- Strategic plan for phasing out the use of fossil fuels with the definition of interim targets and measures in the following areas:

Investments

Underwriting

Own Operations

- ESG in the UNIQA Governance
- Dialog & engagement with our partners and stakeholders
- Outlook for the future with opportunities, chances & potentials as well as challenges

UNIQA Transition Plan

Good to know

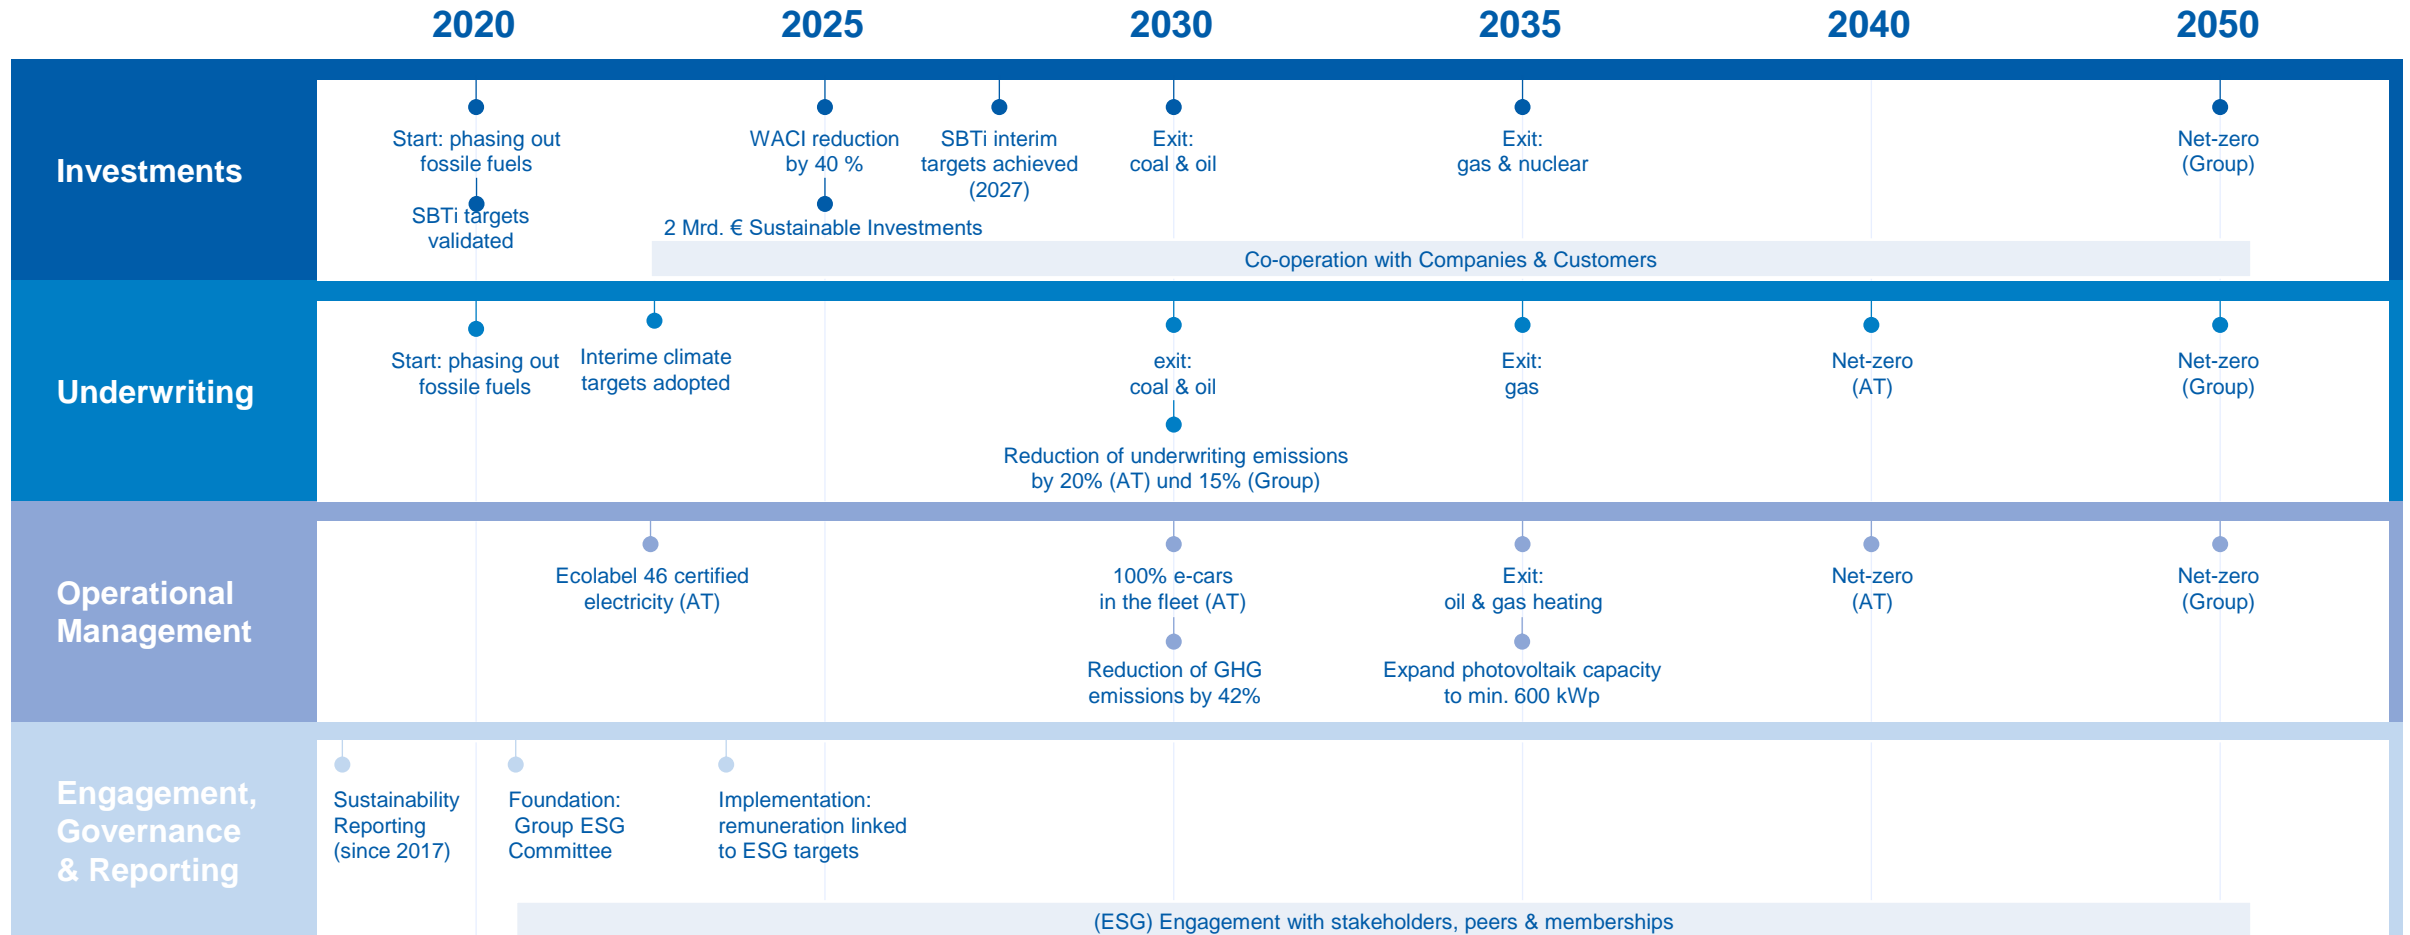

ESRS / CSRD

The **ESRS** (European Sustainability Standards) are part of the **CSRD** (Corporate Sustainability Reporting Directive) and stipulate which sustainability information companies must disclose.

Climate transition planning

- The ESRS E1 (Climate Change) requires companies to disclose their climate strategy, climate targets and **transition plans**.
- A climate transition plan describes how a company adapts its business strategy to the goal of net zero emissions by 2050.

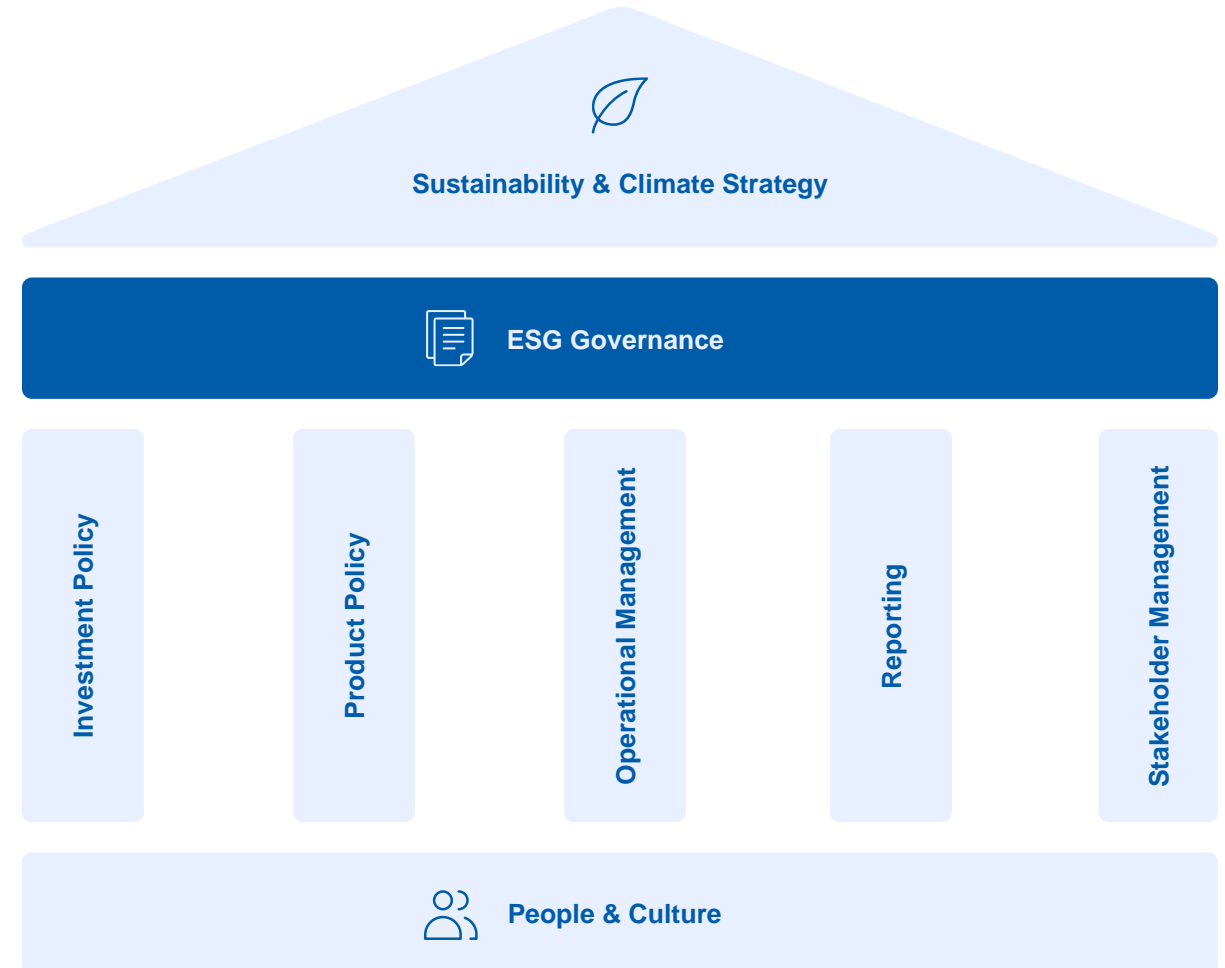

UNIQA on the journey to climate transition

02

ESG

Governance

ESG Governance & Integration

ESG Integration

Strong corporate governance, clear responsibilities, sound stakeholder engagement, comprehensive reporting and assessments by renowned ratings contribute to the active implementation and application of various sustainability measures.

Supervisory Board | deals with sustainability reporting annually in the advisory body of the Audit Committee and decides there on the sustainability strategy to be pursued.

Group ESG Committee

meets quarterly and drives ESG integration into the core business

Members: four members of the Management Board and heads of Corporate Business, Retail Business, Legal & Compliance, Group ESG Office

Tasks

- Strategic definition and continuous development of group-wide ESG ambitions
- Continuous monitoring of stakeholder awareness of environmental and social impacts and setting priorities for stakeholder discourse
- Adoption of the materiality analysis and discussion of significant impacts, risks, and opportunities
- ESG targeting and KPI monitoring
- Monitoring of the group-wide climate strategy and environmental management

Code of Conduct

The UNIQA Code of Conduct summarises all the values and rules we are committed to adhering to and defines the rules of conduct for various areas of our daily work. It governs our interactions with customers, business partners, authorities, and employees. The Code of Conduct is stricter than the law in many respects, and we deliberately go beyond what is required with additional, binding rules – because not everything that is legal is necessarily right. And we strictly adhere to these rules.

The UNIQA Code of Conduct is published on the Group's website:

[UNIQA Code of Conduct](#)

ESG experts throughout the UNIQA Group

Group ESG Office

- Support the ESG management team/committee and business units.
- Quarterly reporting to the Executive Board on the progress of the sustainability strategy, the status of ongoing projects, and the climate strategy to ensure effective monitoring and control.

Investments

ESG experts and ESG teams are anchored within the UNIQA Asset Management

Underwriting

ESG experts and ESG teams are anchored in the respective business areas (corporate business, retail business)

Group functions and central departments

ESG experts are anchored with the departments Human Resources (People), Operations, Group Procurement, NatCat Competence Center, Risk Management, Compliance & Legal etc.

Regarding the **international business units**, **strategic ESG coordinators** were already integrated into the local organisational structure and governance in all countries of the UNIQA Group in 2023.

ESG Governance & Integration

ESG Remuneration

ESG in the Remuneration Strategy*

For the UNIQA Group Management Board and the Austrian core market managers:

- **Variable remuneration is linked to climate-relevant interim targets**, which links incentives to sustainability performance and underlines its importance.
- The objectives and the target figures set depend on the type of program (short-term or long-term variable compensation component) and the target group.
- The members of the Executive Board (group-wide) and the Austrian top management have the reduction of the WACI and the adjusted gender pay gap as the goal of their short-term incentive.

WACI = weighted average carbon intensity

The greenhouse gas emissions of the individual company investments are estimated using this key figure.

Programme	Short-term variable remuneration (STI) – ESG-relevant functions	Short-term variable remuneration (STI)	Short-term variable remuneration (STI)	Long-term variable remuneration (LTI)
Target group	CEO, CFRO, member of the Management Board responsible for ESG	Members of the Management Board excl. CEO, CFRO and the member of the Management Board responsible for ESG	Other executives (members of the management boards of international insurance companies and executives with an STI agreement in Austria)	All Management Board members
Target	Reducing the weighted average carbon intensity (WACI) of the investment portfolio			
Share of annual target bonus	5%	5%	5%	20%
Share of individual target bonus	10%	0%	n/a	n/a
Target	Narrowing the adjusted gender pay gap			Increasing the share of companies in the Group's investment portfolio that have set science-based emission reduction targets (in accordance with SBTi criteria)
Share of annual target bonus	5%	5%	5%	20%
Share of individual target bonus	0%	0%	n/a	n/a
Target	Increasing customer satisfaction			
Share of annual target bonus	10%	10%	10%	
Share of individual target bonus	0%	10%	n/a	

The percentage of compensation awarded to Management Board members in 2024 that is linked to climate-related considerations is **18.0%**.

Material impacts, risks and opportunities

Double materiality analysis & resilience analysis

Based on the **double materiality analysis** conducted, the following disclosure requirements were identified as material:

Environment: ESRS E1
(climate change)

Social: ESRS S1 (own workforce), **ESRS S2** (workers in the value chain), **ESRS S4** (consumers & end-users)

Governance: ESRS G1
(business conduct)

A detailed list of the material topics, sub-topics and sub-sub-topics can be found in the (consolidated) non-financial statement in the management report.

The **materiality assessment** was generally based on assessments by internal experts from the specialist departments and stakeholders and based on the following criteria:

- Scale,
- Scope,
- In the case of negative effects, the remediability factor is used (remediability)
- In the case of potential effects, the likelihood factor is used (likelihood)

For each identified **positive or negative impact**, a **quantitative rating** is assigned based on the criteria mentioned.

A combined value of magnitude, extent, irreversibility (if applicable), and probability of occurrence (if applicable) is calculated to determine the significant impacts.

The analysis of each impact was conducted separately in up to three different time horizons (short, medium, and long term).

The **assessment of the materiality of risks and opportunities** based on the following criteria

- Magnitude
- Likelihood

The UNIQA Group analyses physical and transitory climate risks for its investment portfolio and corporate underwriting portfolio in various scenarios:

- Physical climate risks: e.g., floods, storms, and hail events
- Transitory climate risks: e.g., default risks of corporate bonds and equities due to sector-specific risks

Resilience analysis & scenario analysis

The inclusion of climate change scenarios in risk management aims to assess and strengthen resilience to climate-related risks.

UNIQA uses two scenarios to measure climate-related risks :

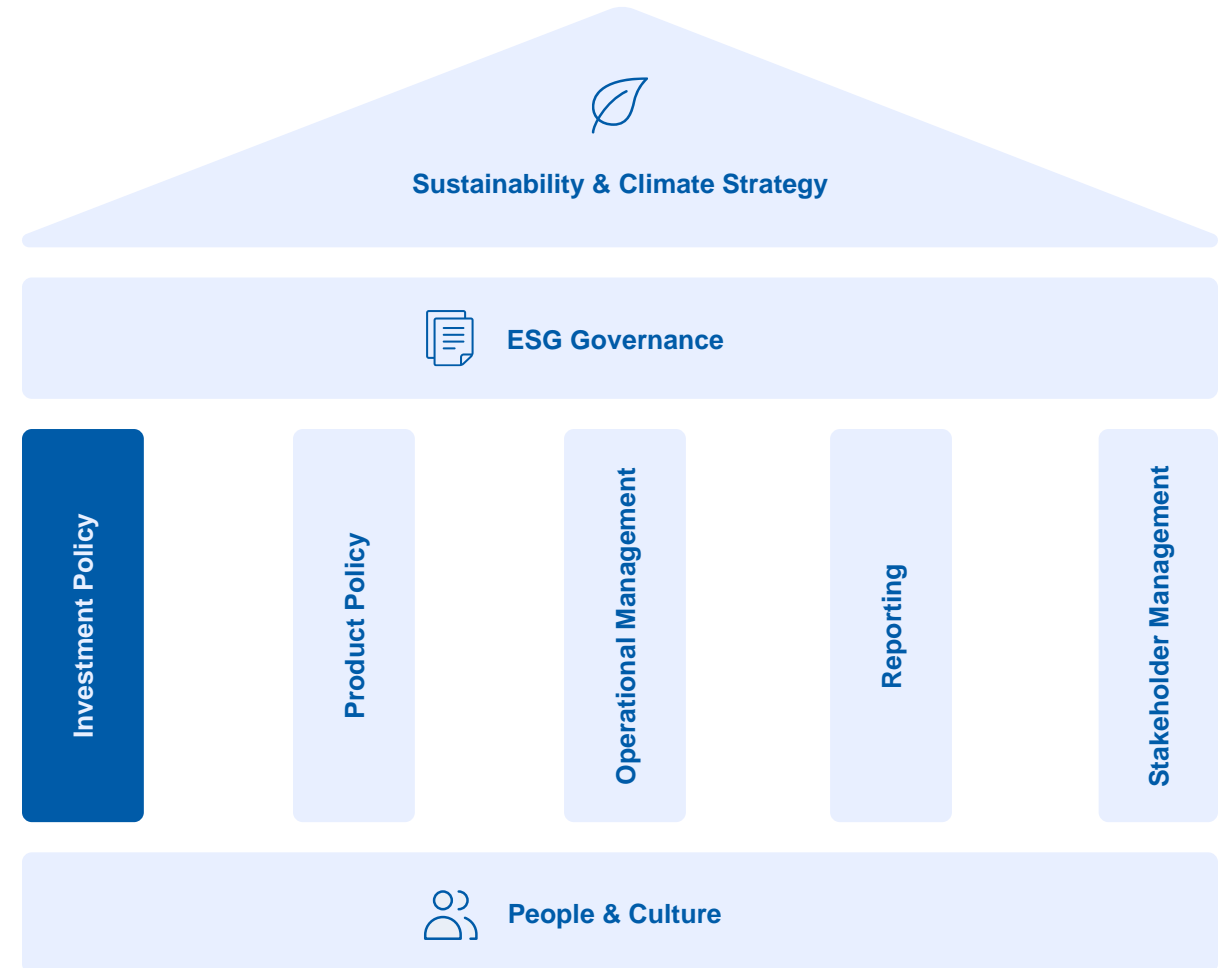

„Early Action“

„No Additional Action“

These two scenarios were chosen because they represent the two most plausible and relevant extremes (high transition risks & low physical risks, low transition risks & high physical risks).

03

Investment Policy

Policies related to climate change mitigation and adaption

Decarbonisation levers

A sustainable investment strategy that considers both sustainability risks and opportunities is economically successful in the long term and represents a positive complement to the classic investment objectives of return, security and liquidity.

Decarbonisation strategy

Phasing out coal, oil, natural gas & nuclear energy

Engagement Strategy

Proaktive & reaktive engagement

Strategy for Sustainable Investments

Green, Social and Sustainability Bonds

Monitoring processes

Responsible Investment Steering Committee

The climate targets of the investment portfolio are based on the Paris 1.5°C climate target pathway and were validated by the Science-based Targets Initiative (SBTi) 2023.

The requirements for our sustainable investment policy are anchored in the UNIQA Group Responsible Investment Guideline.

Dekarbonisierungsstrategie für eigene Investments

Ausstieg aus fossilen Brennstoffen

Oil

- From 2025 onwards, no new direct investments
 - in the expansion of projects from 2025 onwards
 - in oil producers or companies that produce heat from oil if they generate more than 30% of their revenue from oil
- Termination of existing direct investments in oil producers or enterprises that produce heat from oil by 2030, if the producers or companies in question generate more than 5% of their revenues from oil
- Exceptions are made granted for companies with SBTi certified targets in place

Natural gas

- From 2026 onwards, no new direct investments
 - in the expansion of projects
 - in companies that generate more than 30% of their revenue from the natural gas sector
- Termination of existing direct investments in companies that generate more than 5% of their revenue from the coal business by 2035
- Exceptions have been granted for companies with SBTi certified targets in place and companies that conduct EU Taxonomy-aligned activities (revenue, CapEx, OpEx)

Coal

- Roll out of coal exclusion criteria since 2019.
- Since April 2022, no investments have been made in funds including companies that generate more than 10% of their revenue from thermal coal transactions.
- Since 2024, no direct investments have been made in thermal coal producers or energy suppliers that produce electricity from coal if they generate more than 5% of their revenue from coal.

Nuclear energy

- No new direct investments in the expansion of nuclear infrastructure projects from 2025 onwards
- Termination of existing direct investments in companies that generate more than 5% of their revenue from nuclear energy by 2035
- Exceptions have been granted for companies with SBTi certified targets in place and companies that conduct EU Taxonomy-aligned activities (revenue, CapEx, OpEx)

Engagement Strategy

Investment Policy

Engagement Strategy for sustainable investments

The engagement with the companies aims to improve the performance of the portfolio companies, particularly regarding their climate strategy, decarbonisation targets, and measures.

As part of this engagement, UNIQA focuses on the following areas to promote climate protection:

- Implementation of a governance framework that defines responsibilities and oversight for climate risks.
- Measures to reduce GHG emissions along the entire value chain in line with the Paris 1.5°C climate target pathway, as well as the setting of SBTi-validated targets, if not already set.
- Transparent disclosure of the resilience of the corporate strategy to various climate scenarios.

Membership since November 2022: Climate Action 100+

Since 2022, UNIQA has pursued a reactive (collaborative) engagement as part of our membership in the investor initiative Climate Action 100+, which focuses its engagement on the 166 companies with the highest emissions worldwide and pursues three goals:

- Implementing strong corporate governance with board accountability and oversight of climate change risks.
- Implementing measures to reduce greenhouse gas emissions across the entire value chain (in line with the Paris Agreement target).
- Improving corporate disclosure in line with the Task Force on Climate-Related Financial Disclosures (TCFD) and the sector-specific Global Investor Coalition on Climate Change (GIC).

Strategy for sustainable investments: Engagement Strategies

Proactive engagement = direct bilateral engagement with individual investee companies. Bilateral discussions are held with ESG managers at the respective companies to achieve progress on their specific targets.

Reactive Engagement = collaborative engagement that UNIQA pursues as part of its membership in the Climate Action 100+ (CA 100+) investor initiative. As part of the initiative, a group of international investors reach out to the world's 170 largest corporate greenhouse gas emitters to align their climate strategy and reporting with science-based climate targets

Targets – Decarbonisation Strategy

Science-Based Climate Targets (SBTi) & Carbon Emission Intensity (WACI)

Science-based climate targets for the investment portfolio (financial year 2024)

Target definition	Unit	Base year (2021)	Target year (2027)	Target year (2030)
Listed shares and corporate bonds				
SBTi validated share of investment volume for this asset class	% of investments	23%	48%	-
Project financing for electricity generation				
Reducing financed emissions by 74.2 % per MWh	t CO ₂ e/MWh	0.224	-	0.058
Other long-term corporate loans				
SBTi validated share of investment volume for this asset class	% of investments	3%	34%	-
Corporate loans for electricity producers				
Provision of corporate loans exclusively for the generation of renewable electricity by 2030	At present, corporate loans are available exclusively for the generation of renewable electricity. The target is to continue only financing corporate loans for renewable electricity generation.			

Climate targets for the investment policy

The focus of the SBTi targets within the decarbonization strategy is on reducing emissions intensity, promoting renewable energies, and investing in SBTi-validated companies.

UNIQA has set interim targets in four investment asset classes that have been validated by the SBTi and are consistent with the 1.5°C climate target pathway.

The SBTi interim targets accounted for 23% of investments in the base year 2021. This portfolio share represents the activities required by the SBTi guidance. The remaining portion of investments consisted of 19% optional activities and 58% activities outside the scope of coverage*.

Gewichtete durchschnittliche Carbon Emission Intensity (Angaben in tCO₂e)

Weighted average carbon emission intensity (in t CO ₂ e / € million revenue)	Base year (2021)	Financial year (2024)	Target year (2025)	Target year (2030)	Annual reduction in % from 2021 to 2030
Scope-1- and Scope-2-emissions	99	44	60	40	9.50%

The greenhouse gas emissions of individual company operations are calculated using the **weighted average carbon emission intensity (WACI)**.

Targets – Sustainable Investments

Sustainable Investments & absolute financed emissions

Sustainable Investments

- Through Sustainable Investments, UNIQA finances companies that contribute to emissions reduction or social projects.
- As part of its membership in the Net Zero Asset Owner Alliance, UNIQA has set a target volume of €2 billion in Sustainable Investments by 2025. This target was already exceeded in 2023 and further increased to **€2.4 billion** in 2024.
- The share of Sustainable Investments in the total portfolio will thus amount to **11%** in 2024.

Comprise in %

- Green Bonds
- Social Bonds
- Sustainability Bonds
- Article-9-Funds
- Sustainable infrastructure projects and technologies

Sustainable investments are analysed not according to their emissions but according to their transformation potential.

Absolute financed emissions

Absolute financed emissions from investments in companies (Scope 3.15)

- These financed emissions include Scope 1, Scope 2, and Scope 3 emissions of the companies in which the investment is made.
- Coverage of financed emissions from investments is 82% (investments in listed companies, corporate bonds (excluding secured notes), and corporate loans). The invested volume is 5,929.3 million Euro.
- The absolute financed emissions are subject to the Group's net-zero target by 2050.

Scope 3, category 15: companies (absolute financed emissions) in t CO₂e

Financial year (2024)

Scope 1 and Scope 2 financed emissions produced by companies	311,638
Scope 3 financed emissions produced by companies	4,209,134

Absolute financed emissions from government bonds (Scope 3.15)

- The financed emissions from investments in government bonds cover the governments' Scope 1, Scope 2, and Scope 3 emissions.
- The data covers 99% of direct investments in government bonds. The emissions financed by UNIQA are calculated using the PCAF methodology: the value of the respective government bond divided by the inflation-adjusted gross domestic product multiplied by the sum of the government's Scope 1, Scope 2, and Scope 3 emissions.

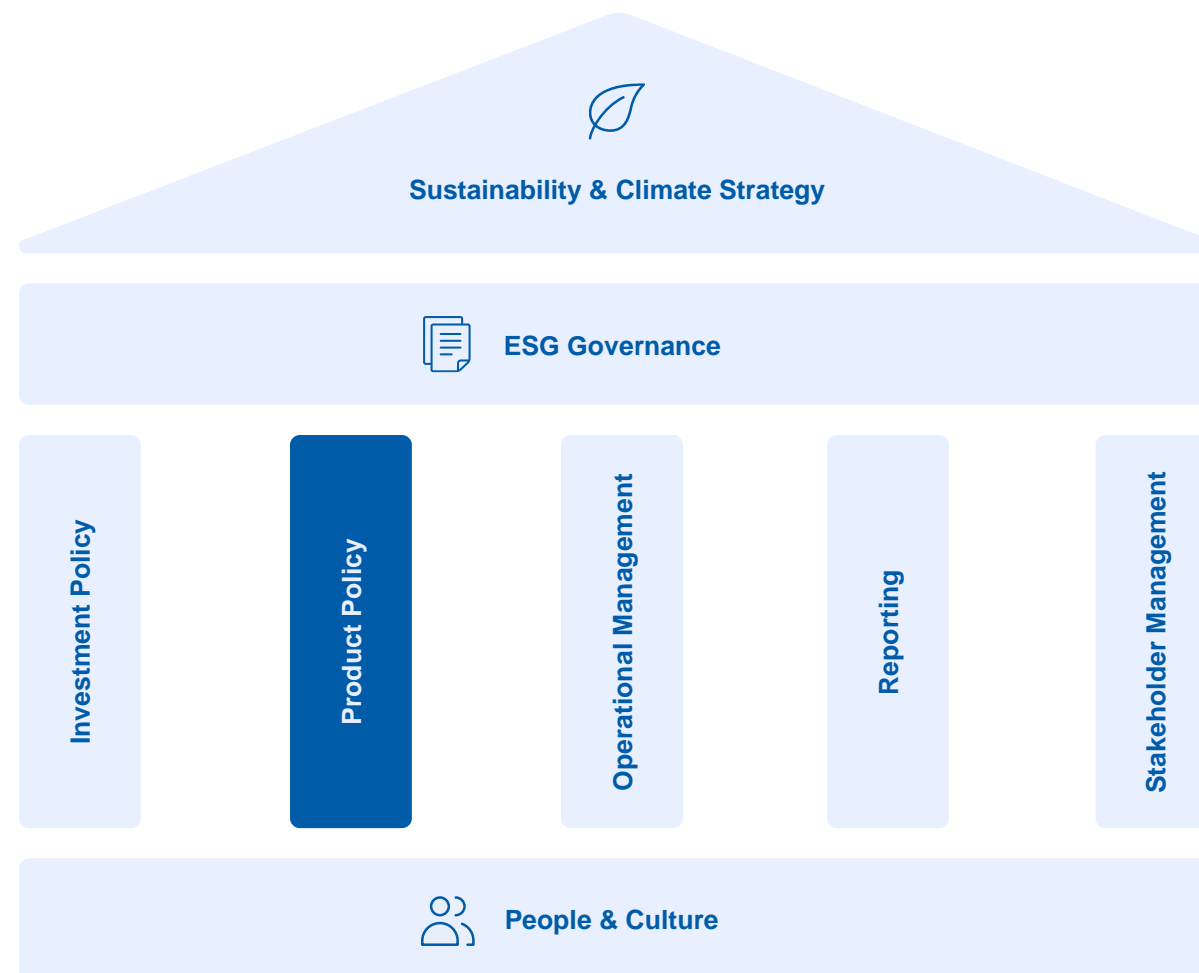

Scope 3, category 15: government bonds (absolute financed emissions)

Financial year (2024)

Financed emissions from investment in government bonds	1,924,006 t CO ₂ e
Invested volume	7.105,6 m€

04

Product Policy

Policies related to climate change mitigation and adaptation

Underwriting – Corporate Business

Strengthening customer resilience to climate-related risks

Supporting clients to build financial resilience and manage the impacts of climate change adaptation.

- Advice & prevention
- Improving competency & quality
- UNIQA Sustainable Business Solutions

Decarbonisation strategy

Decarbonisation targets to achieve net-zero emissions

Expansion of the renewable energy business

Engagement strategy: Engagement with corporate clients with the highest emissions share in the portfolio (top 10 emitters)

Development of new sustainability products and components

UNIQA is pushing the development of innovative sustainability products and components to respond to growing market demands and the increasing need for environmentally friendly solutions.

The requirements regarding sustainability in the insurance business with corporate customers are centrally regulated in the [UNIQA Sustainability Strategy in Corporate Business](#).

Strengthening customer resilience to climate-related risks

Underwriting – Corporate Business

This component includes an active role for UNIQA in supporting our customers to strengthen their **financial resilience** and manage the impacts of **climate change adaptation**.

Advisory & prevention

UNIQA advises companies on how to strengthen their resilience to risks posed by climate change by providing first aid measures, offering policyholders consulting services to mitigate losses in the event of severe weather events. It also develops and offers preventive measures to mitigate climate risks.

Improving competency & quality

In diesem Bereich sollen die Kompetenz der Kund:innen im Umgang mit Klimarisiken erweitert, die Qualität standardmäßiger Risikoresilienzmaßnahmen verbessert und umfassende Beratung angeboten werden, um den wachsenden Bedarf von Unternehmen in Bezug auf sich verstärkende Klimarisiken zu decken.

UNIQA Sustainable Business Solutions

The 2024 founded consulting company offers comprehensive risk and hazard analyses, and recommendations for climate change adaptation in Austria, Poland, Slovakia, and the Czech Republic. By collaborating with experts in climatology and meteorology and leveraging decades of experience in risk engineering, UNIQA Sustainable Business Solutions will provide commercial and industrial clients with detailed reports on their climate resilience.

Decarbonisation Strategy

Underwriting – Corporate Business

Oil

- Since 2024, no new insurance contracts have been concluded with companies that generate more than 30% of their revenue from activities in the oil sector (production, processing, power generation)
- By 2030, all portfolio items with companies that generate more than 5% of their revenue from activities in the natural oil sector will expire

Coal

- Since 2019, no new insurance contracts have been concluded with companies that generate more than 30% of their revenue from activities in the coal sector (production, processing, power generation)
- Since 2023, no new business has been entered into with companies that generate more than 5% of their revenue from activities in the coal sector
- By 2030, all portfolio items with companies that generate more than 5% of their revenue from activities in the coal sector will expire

Natural gas

- From 2025 onwards, no new insurance contracts will be concluded with companies that generate more than 30% of their revenue from activities in the natural gas sector (production, processing, power generation)
- By 2035, all portfolio items with companies that generate more than 5% of their revenue from activities in the natural gas sector will expire
- In deviation from the gas phase-out stipulated in the decarbonisation strategy, in 2025 UNIQA will make a temporary exception for the territory of Ukraine and offer new insurance coverage for small-scale gas-fired power plants considering the ongoing war and the energy infrastructure that has been severely affected as a result

Nuclear energy

UNIQA does not insure nuclear energy risks either directly or through reinsurance.

Companies that have made a public commitment to the decarbonisation of their core business in accordance with the Paris Agreement are exempt from the phase-out of fossil fuels.

Decarbonisation Strategy

Underwriting – Corporate Business

Expansion of the renewable energy business

- **Decarbonising energy supplies** is crucial: this sector should be supported with insurance solutions.
- **Premium volume in the renewable energies segment**
 - Premiums from companies whose main economic activity is generating power from renewable energy sources (solar energy, wind, biomass, hydropower, geothermal energy)
 - Premiums for insured renewable energy installations owned by companies that primarily engage in other economic activities (photovoltaic installations, hydropower plants, biomass power plants)
- **2024:** the renewable energy segment achieved a **premium volume of €23.3 million**.

Engagement with companies with the highest share of emissions in the portfolio

- Insurance-associated emissions show a widespread in CO₂ emissions, with large industrial companies accounting for a large share.
- **Detailed analysis of the top 10 emitters:** In each country in which UNIQA operates and where insurance-related emissions are calculated, the ten customers that contribute most to the portfolio's CO₂ emissions are analysed for the existence of a climate strategy and targets consistent with the Paris 1.5°C climate target pathway.
- The analysis supports UNIQA on its path to achieving its net-zero emissions target and improves the overview of how the specific customer structure is addressed in each market, particularly in high-emission sectors.
- **Results:**
 - 35 % of the companies have set net-zero targets
 - 44 % of the companies disclose specific information on their sustainability agenda, even though they have not explicitly committed to net-zero
 - 21 % of the companies do not publish sustainability information

Sustainability Risk Assessment

The following sustainability risks are assessed:

E – Environmental matters	S – Social matters	G – Governance matters
Climate Change	Human Rights	Corruption and money laundering
Pollution	Controversial weapons	Poor corporate governance
Protected sites/species		Poor product and service quality
Non-sustainable practices		
Animal welfare and testing		

Results from the sustainability risk assessment of customers with fossil-fuel related activities

	Financial year (2024)
Number of enquiries involving ESG risk	120
of which rejected	69
of which subject to conditions	21
of which approved	30

Decarbonisation Strategy – KPIs & targets

Underwriting – Corporate Business

Gross premiums in the corporate customer non-life insurance business for companies that operate in the coal, crude oil or natural gas sectors in € million

	2024
Coal	16.5
Oil	1.7
Natural gas	22.4
Share of premiums from coal companies in property and casualty insurance products	0.4%
Share of premiums from crude oil companies in property and casualty insurance products	0.0%
Share of premiums from natural gas companies in property and casualty insurance products	0.5%

Share of customers with climate targets subject to mandatory reporting requirements under NFRD/CSRD

	Customers with net-zero targets	Customers with SBTi targets	Target (2040)
Ratio between the number of insured companies subject to NFRD/CSRD reporting requirements with a target to limit global warming to 1.5°C for their core business and the total number of insured companies subject to NFRD/CSRD reporting requirements	48%	16%	100%
Ratio between the gross annual premiums of insured companies subject to NFRD/CSRD reporting requirements with a target to limit global warming to 1.5°C for their core business and the gross annual premiums of insured companies subject to NFRD/CSRD reporting requirements	54%	55%	100%

Decarbonisation Strategy – KPIs & targets

Underwriting – Corporate Business

Insurance-associated emissions

As a member of the Green Finance Alliance (GFA), UNIQA strives to report insurance-related greenhouse gas emissions and set targets to reduce emissions to net zero by 2040 in Austria and by 2050 across the Group.

In 2023, an analysis of the Austrian corporate customer portfolio was conducted for the first time using the PCAF methodology for measuring insurance-related emissions. In the 2024 financial year, a calculation of insurance-related emissions for the entire UNIQA Group followed.

Targets for insurance-associated emissions (Scope 1 & 2)

	Austria	Other countries in which UNIQA operates
Baseline value 2022 in t CO₂e	34,336	58,087
2025	-5%	-5%
2030	-20%	-15%
2035	-40%	-25%
2040	-60%	-40%
2045	-	-45%
2050	-	-50%

Insurance-associated emissions

Gross GHG emissions in Scope 1, 2 and 3 categories and total GHG emissions

In 2024, **insurance-associated emissions from corporate banking totalled 176,136 t CO₂e**.

- Austrian portfolio: 48,692 t CO₂e (Scope 1 und 2 28,340 t CO₂e, Scope 3 20,352 t CO₂e).
- International portfolio: 127,444 t CO₂e (Scope 1 und 2 84,805 t CO₂e, Scope 3 42,639 t CO₂e).

Sustainability within the Retail Business

Live & non-life insurance

UNIQA offers customers interested in sustainability transparency in their purchasing decisions.

Strategic target

Supporting customers in reducing emissions

- Sustainable elements in retail products can help customers adapt to climate change while reducing their risk of climate-related impacts.
- UNIQA can provide incentives for decarbonisation and increased energy efficiency among its customers through appropriate products.
- This development is leading to significant insurance claims in the agriculture, motor, and household insurance sectors, among others.

Gross GHG emissions of Scope 1, 2 and 3 & total GHG emissions

- Insurance-associated Scope 3 emissions from the private motor portfolio
- **Basis:** Calculation models and estimates according to the PCAF standard
- **2024:** Insurance-associated emissions from the motor portfolio: 393,405 tCO₂e.
- **Measures and targets:** UNIQA aims to improve the accuracy and transparency of its motor portfolio calculations. A refinement of the data sources used for the kilometers driven in the respective countries is planned.

Sustainability in the product development

With a group-wide **Product Development Process Policy**, UNIQA has set itself the goal of developing products and services with sustainability in mind and pursuing an ecologically and socially sustainable approach to value creation. The integration of sustainability aspects into product development is consistent with the group-wide sustainability strategy.

Actions in Austria

- In 2024, new ESG components were brought to market through product innovations and revisions.
- Especially in property insurance:
 - “Renewable Energy Technology” component of property insurance now gives customers the ability to insure energy generation and recycling facilities Nutzungssysteme (z.B. Solarpanele und Wärmepumpen) sind unabhängig von anderen Deckungen.
 - A new tariff for motor vehicles has been introduced, which includes special services for electric vehicles and their batteries as well as a CO₂ tariff model
- Numerous training and further education courses
- Retail Strategy, Guideline, ESG Product Check

Actions in international markets

Other companies in the UNIQA Group are also increasingly focusing on sustainability matters in their products. For example, a carbon pricing model for vehicles that offers advantages for vehicles that produce lower carbon emissions has been on the market in Czechia and Slovakia since 2023 and in Croatia since 2024.

Social aspects related to our value chain

Corporate customers, private customers & suppliers

UNIQA is committed to the **10 principles of the UN Global Compact**, which include respect for human rights. These principles are reflected in the observance of human rights towards corporate customers, private customers, and suppliers.

Corporate Customers

The insurance coverage offered indirectly influences the business activities and working conditions of the employees of corporate customers.

The assessment of corporate customers during the acceptance review and ongoing evaluation is decisive.

Concepts

- The assessment of corporate customers regarding ESG risks in the underwriting process is ensured by the UNIQA Sustainability Strategy in Corporate Business and the ESG Underwriting Standard.
- Risk assessment regarding ESG issues is carried out for insurance offerings in property, liability, and marine insurance, as well as for the financial lines of the industrial customer segment.

Private Customers (Retail Business)

The provision of insurance services, as a core business activity, can have consequences, particularly for policyholders. Insurance products offered are tailored as precisely as possible to customer needs.

Konzepte & procedures

- Group Product Development Process Policy
- AT: ESG Retail Strategy including diversity & inclusion
- Various methods exist to incorporate customer opinions into decision-making and continuously measure their satisfaction:
 - Feedback opportunities
 - Surveys
 - Evaluation options (five-star ratings))
- Market research as part of the product development process
- Promoting comprehensive sustainability awareness among advisors

Suppliers

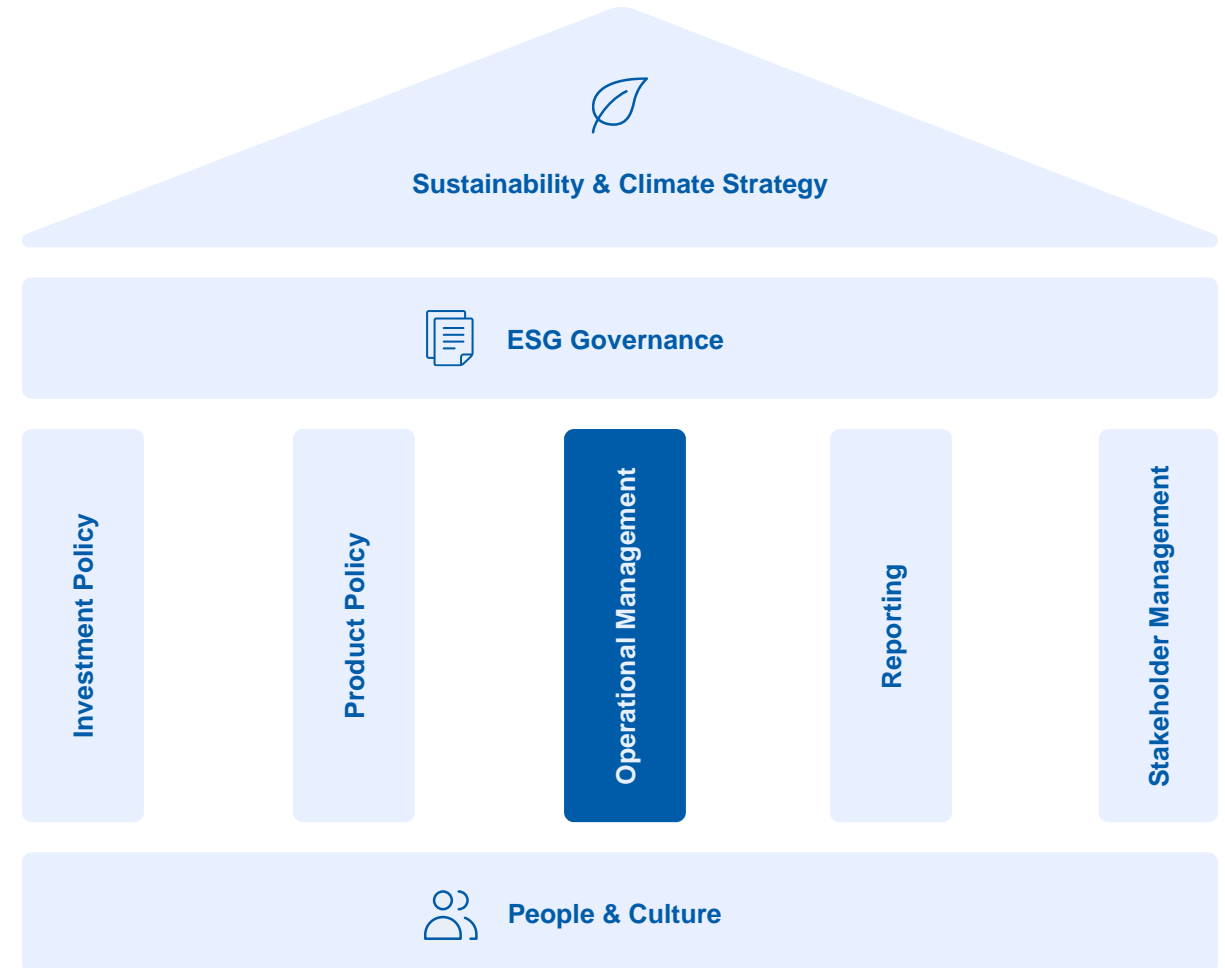

The supplier selection can indirectly influence the working conditions of workers. The selection and annual evaluation of suppliers is intended to prevent labor law violations starting in 2025. In the future, this issue will be addressed by the Corporate Sustainability Due Diligence Directive (CSDDD).

Concepts

- Group Procurement Policy as a framework for procurement processes
- Suppliers (from a defined order value) must complete a questionnaire on human trafficking, forced and child labor

05

Operational Management

Policies related to climate change mitigation and adaptation

Decarbonisation levers

The UNIQA Sustainability & Climate Strategy also applies to the Operational Management, to owner-occupied properties, and to properties held as financial investments.

The UNIQA Group's own sustainability efforts are intended to inspire corporate and private customers, investors, employees and other stakeholders to act in an ecologically and socially responsible manner.

The UNIQA Group is setting a good example and consistently implementing its commitment to continuously reducing its own operations' CO₂ emissions.

The climate targets for the own operations are aligned with the 1.5°C Paris target pathway. The interim targets for 2030 have been successfully validated by the science-based targets initiative (SBTi).

Decarbonisation of real estate/ vehicle fleet and increase in energy efficiency

SBTi-validated target: to reduce GHG emissions (Scope 1 and 2) from owner-occupied properties and the vehicle fleet by 42% by 2030 compared to 2021

Electrification of the vehicle fleet

The goal is a **complete switch to electric vehicles** – in Austria by 2030 and across the Group by 2040.

Use of renewable energies

2024: Ecolabel 46 certified electricity in Austria

Continuous **expansion of photovoltaic systems**

Heating systems: Conversion to renewable energies

Management Systems

2024: The existing internal energy management was integrated into an environmental management system certified according to EMAS and ISO 14001 (at Austrian sales locations and MavieMed* locations)

* Name change from PremiQaMed to Mavie Med in March 2025

Science-based targets

Science-Based Target initiative (SBTi)

Scope 1 & 2 CO₂ emission targets of the UNIQA Group

Scope 1 & 2 CO₂ emission targets of UNIQA

- 42%
Scope 1 & 2 GHG emissions from owner-occupied properties & vehicle fleet by 2030 (2021)

The UNIQA Group has set SBTi interim targets for its own operational management.

We commit to reducing our direct Scope 1 and indirect Scope 2 GHG emissions from owner-occupied properties and vehicle fleet by 42% by 2030 (2021).

1

Scope 1 includes GHG emissions from heating energy (natural gas and heating oil), coolants and own vehicles (diesel and gasoline).

2

Scope 2 includes GHG emissions from purchased district heating and electricity (market-based approach).

Up to and including 2024, the Scope 1 and Scope 2 GHG emissions decreased by 13.3% (2021*). The 2021 baseline was retroactively changed to 14,510 t CO₂e in 2024 and now includes all owner-occupied properties (owned and rented) and the vehicle fleet.

KPIs & targets

Operational Management

Use of renewable energy: photovoltaics

In 2024, **photovoltaic systems with a capacity of 205 kWp** were installed in Austria. This results in an estimated reduction in Scope 2 greenhouse gas emissions (site-based) of 64 tCO₂e per year.

Target: By 2035, 10% of the annual electricity consumption of the Austrian sales locations is to be covered by self-generated photovoltaic electricity.

Energy consumption & energy mix

Total energy consumption of owner-occupied properties and investment properties amounted to **258,168 MWh** in 2024.

54% of the energy consumed in owner-occupied properties came from **renewable energy sources**.

Scope-1- & Scope-2- emissions from owner-occupied properties and the vehicle fleet

Up to and including 2024, **Scope 1 and Scope 2 GHG emissions decreased by 13.3%** (2021).

Target: UNIQA commits to the science-based interim target of reducing Scope 1 and Scope 2 emissions from its own-occupied properties and vehicle fleet by 42% by 2030 compared to the base year 2021.

Heating

In 2024, an estimated 25 t of Scope 1 GHG emissions were saved: the **average heat consumption** of owner-occupied properties and investment properties amounts to **142 kWh/m²**, and the **specific electricity consumption to 94 kWh/m²**.

Target: By 2035, all oil and gas heating systems at sales locations in Austria are to be replaced by ecological alternatives (heat pumps, district heating or biomass heating).

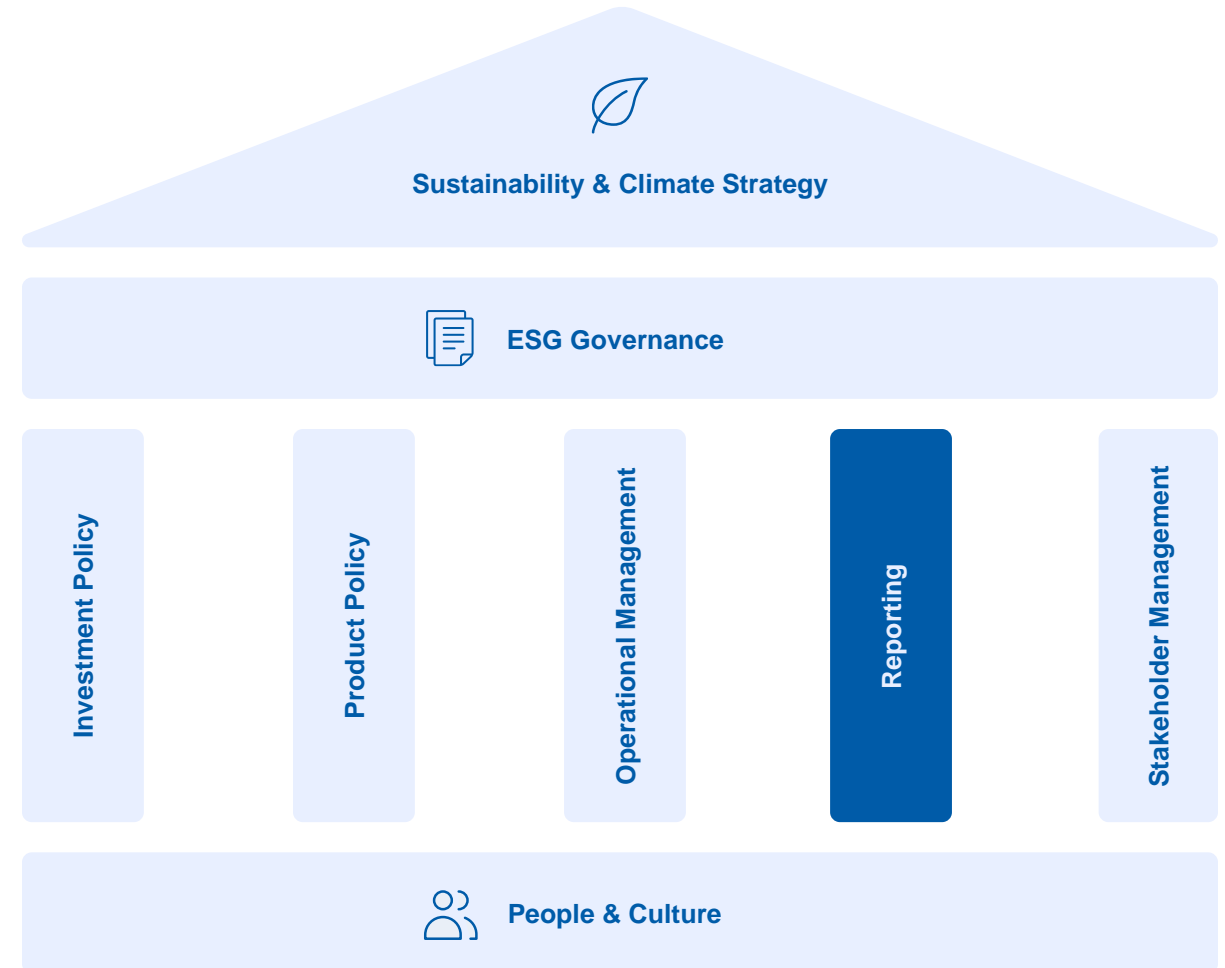

Vehicle fleet

In 2024, the **share of electric vehicles** in Austria increased from 48% to **57%**, saving approximately 54 t of Scope 1 GHG emissions. According to manufacturer data, the average CO₂ emissions of the vehicle fleet in Austria in 2024 is 35 g CO₂e/km.

Target: achieving a complete transition to electric vehicles (100%) by 2030 in Austria and by 2040 across the Group.

06

Reporting

International memberships & commitments

UN Global Compact (UNGC)

UNIQA has been a member of the UN Global Compact since May 2020. The ten principles of the UN Global Compact provide guidance for action in our business and set the basis for our sustainability activities.

Principles for Responsible Investment (PRI)

In November 2020 UNIQA signed on to the United Nations Principles for Responsible Investment (UN PRI), which aim to integrate ESG principles into investment decisions and management.

Sustainable Development Goals (SDGs)

UNIQA supports the 2030 Agenda for Sustainable Development adopted by the United Nations in September 2015. The core elements of this initiative are the 17 SDGs with their 169 sub-goals. Four SDGs are particularly relevant for the UNIQA Group: Good Health and Well-being (SDG 3), Quality Education (SDG 4), Gender Equality (SDG 5) and Climate Action (SDG 13).

Green Finance Alliance (GFA)

In April 2022 UNIQA joined the Austrian Green Finance Alliance (GFA), which is a Federal Austrian Engagement Program for financial institutions to lead the way for reaching the 1,5 Degree Paris-Climate Targets. It focuses on Investments, Underwriting and Own Operations and explicitly refers to exit strategies in coal, oil and gas as well as to certified environmental management systems. The UNIQA Group's membership in the GFA contributed to her active decarbonization and transition journey.

Principles for Sustainable Insurance (PSI)

The UNIQA Group has been a signatory of the United Nations Environment Programme Finance Initiative (UNEP FI) Principles for Sustainable Insurance (PSI) since November 2020. The initiative serves a global framework to address ESG risks and opportunities and intends to better manage opportunities to provide quality and reliable risk protection.

International memberships & commitments

Science Based Targets initiative (SBTi)

In 2023 UNIQA joined the SBTi (Science Based Targets initiative) by signing the commitment letter and setting targets. The Science Based Targets initiative drives ambitious climate action in the private sector by enabling organizations to set science-based emissions reduction targets. In March 2023, UNIQA has submitted its targets to the SBTi and was successfully validated in Dec 2023.

Climate Action 100+

In November 2022, UNIQA joined the Climate Action 100+ initiative, which focuses its commitment on the 166 highest-emitting companies worldwide that are critical to climate neutrality. In doing so, it strives to achieve three goals: Implementing strong corporate governance with board accountability and oversight of climate change risks, implementing measures to reduce greenhouse gas emissions throughout the value chain (in line with the Paris Agreement goal), and improving corporate disclosure in line with the Task Force on Climate-Related Financial Disclosures (TCFD) and the sector-specific Global Investor Coalition on Climate Change (GIC).

Net-Zero Asset Owner Alliance (NZAOA)

In October 2021, the UNIQA Group joined the United Nations Net-Zero Asset Owner Alliance (NZAOA). The Alliance is an international group of institutional investors who have committed to converting their investment portfolios to net-zero greenhouse gas emissions (GHGs) by 2050. The Net-Zero Asset Owner Alliance represents approximately USD 10 trillion in assets under management and promotes a collective approach among investors to align their portfolios with the goals of the Paris Agreement. In 2023, the UNIQA Group reported to the NZAOA for the first time and contributed to the annual progress report.

UNIQA as a member of the Green Finance Alliance

- UNIQA among the **first nine members**
- Leading the way** in climate protection
- Voluntary **commitment**
- Target dimensions for the core business, including**

 - Portfolios will be aligned with the 1.5°C Paris Climate Agreement target
 - GHG neutral portfolios in 2050
 - Climate risks are managed, and resilience is promoted

1.5°C alignment of the portfolio

Net-zero by 2050

Expansion of green activities

Aktionspunkte:
Kapitalanlagen und Versicherungsbestand

Governance & mainstreaming in relevant company areas

Climate risk management and promoting resilience

Member of

Green Finance Alliance

- Measured and detailed criteria are defined for each target dimension and field of action.
- These criteria are based on current international climate protection standards and science-based methods.
- Annual monitoring and reporting by the GFA members.
- The investment portfolio and underwriting portfolio fields of action are supplemented by the operational ecology field of action.

Science-Based Targets initiative (SBTi)

Scope 1, 2 & 3.15

The Science-based Targets Initiative (SBTi) is a cooperation between CDP, the United Nations Global Compact, the World Resource Institute (WRI) and the World Wide Fund for Nature (WWF).

The SBTi aims to advance ambitious climate policies by setting science-based climate targets.

Targets

1

Commitment to **reduce absolute GHG emissions** from owner-occupied properties and the vehicle fleet in **Scope 1 and Scope 2 by 42%** by 2030 (compared to the base year 2021)

2

Commitment that by 2027, **48% of the listed equities and bonds portfolio** (measured by invested value) will be attributable to issuers that have set science-based targets

3

Commitment that by 2027, **34% of the corporate loan portfolio** (measured by invested value) will be allocated to companies that have set science-based targets

4

Commitment to **finance only renewable electricity generation** in the Corporate Loan Electricity Generation portfolio.

5

Commitment to **reducing GHG emissions from the Electricity Generation Project Finance portfolio** by **74.2% per MWh** by 2030 compared to a 2021 baseline.

CSRD/ESRS Report

For the 2024 reporting year, the UNIQA Group is required to prepare comprehensive sustainability reporting aligned with the **Corporate Sustainability Reporting Directive (CSRD)** and the underlying **European Sustainability Reporting Standards (ESRS)**. The sustainability report (Non-Financial Report) will therefore be integrated into the UNIQA Group Report.

ESRS

12 sector-independent standards

- Two cross-cutting standards
- Ten topical standards (Environment, Social and Governance)

As part of the double materiality analysis, **the following topics were identified as material:**

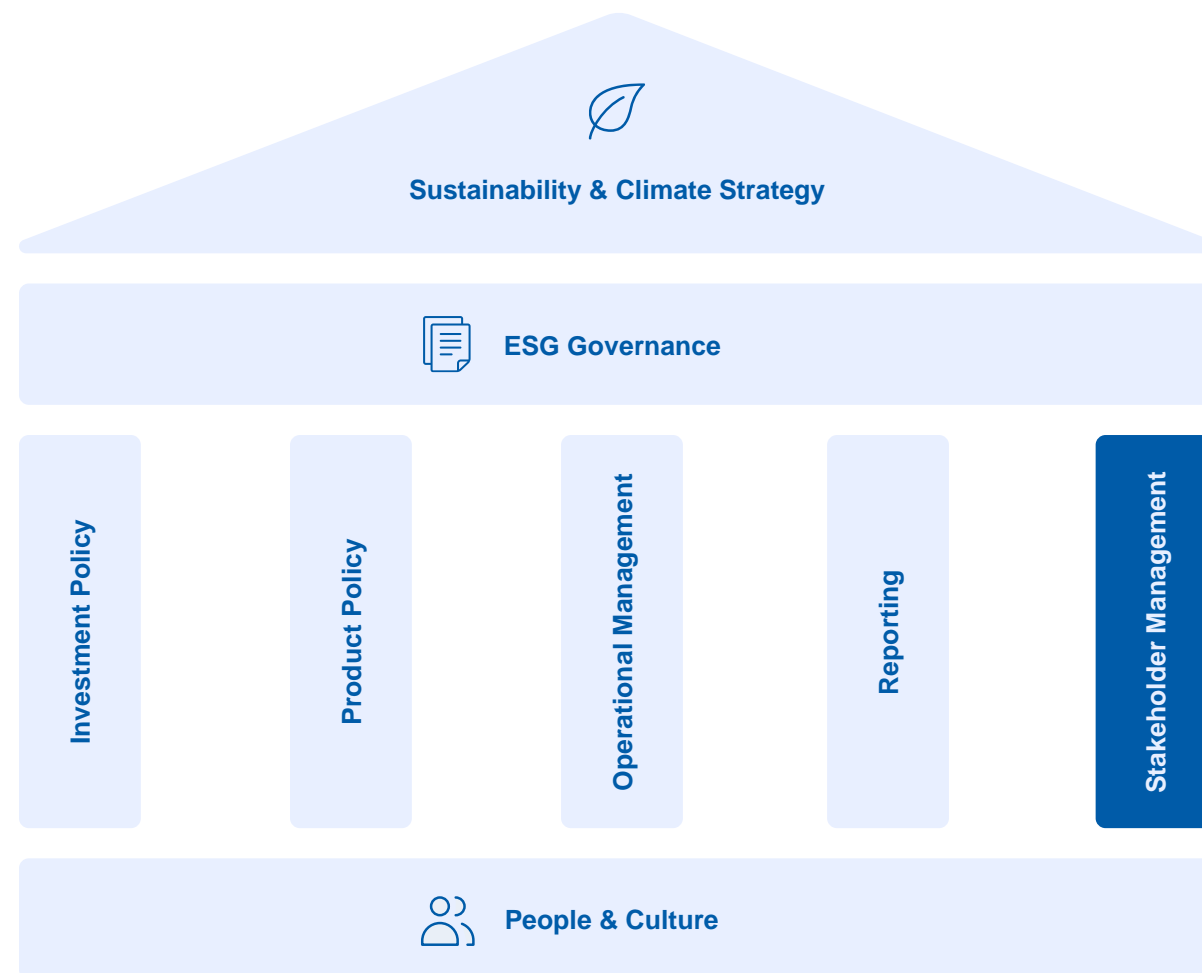

- ESRS 1 (General Requirements)
- ESRS 2 (General Disclosure)
- ESRS E1 (Environment: Climate Change)
- ESRS S1 (Social: Own Workforce),
- ESRS S2 (Social: Workers in the Value Chain),
- ESRS S4 (Social: Consumers & End-users),
- ESRS G1 (Governance: Business Conduct)

A detailed list of the material topics, sub-topics and sub-sub-topics can be found in the (Consolidated) Non-Financial Report in the UNIQA Group Report.

Stakeholder Management

Sustainable value creation

The connection between
sustainability and economy

Stakeholder Engagement: achieving more together

Combining economic aspirations with a clear ecological and social commitment to the environment and society.

Ensuring a continuous dialogue and discourse with the various interest groups and stakeholders to respond appropriately to current and future challenges and opportunities.

Our stakeholder engagement focuses on four key stakeholder groups that have a significant impact on our business and/or are significantly impacted by our business.

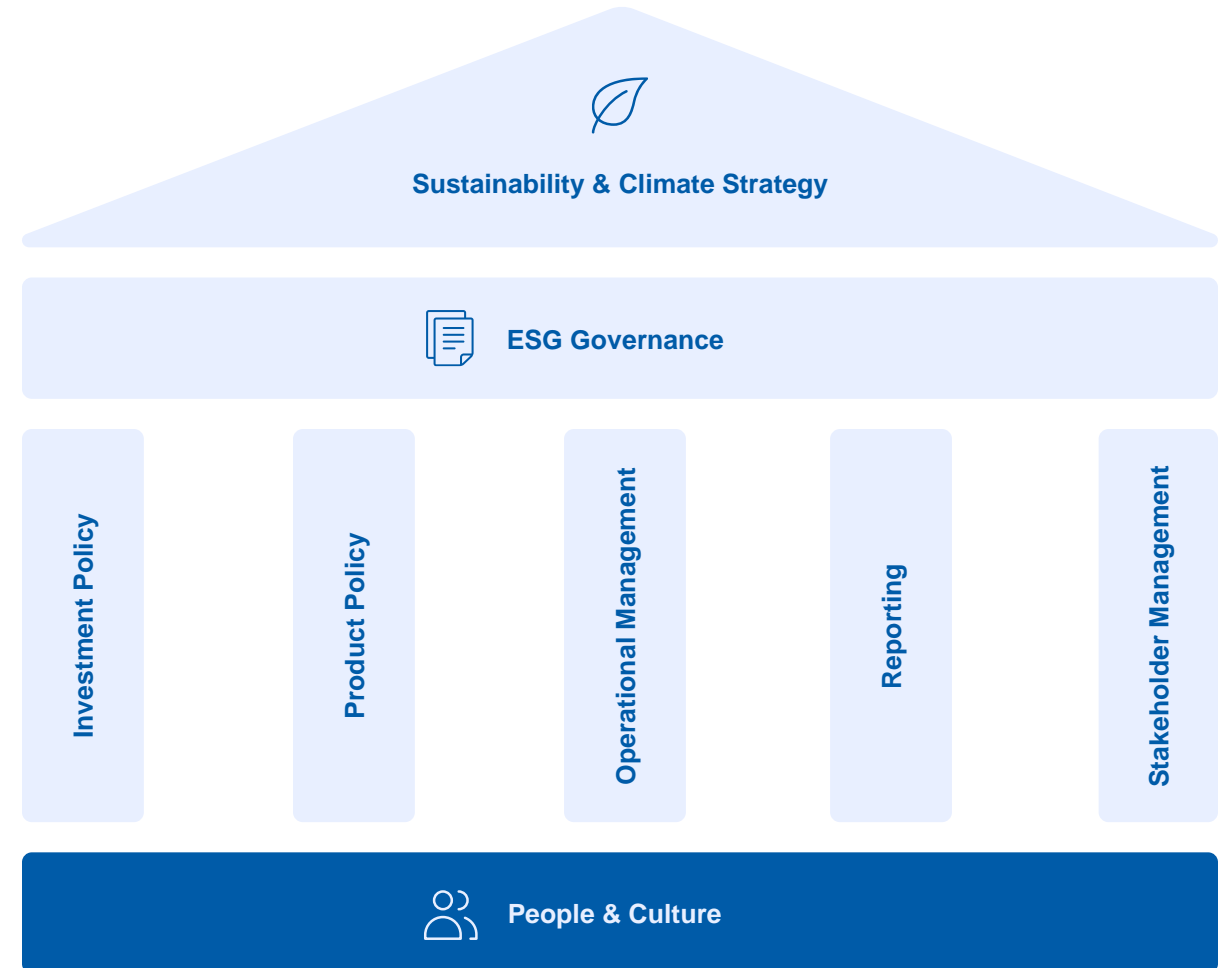

Sustainable value creation

08

People & Culture

People Strategy

The People Strategy ensures that **employees are integrated into the business model** across the Group. A across all core markets promotes international collaboration, employee development, and mobility, thereby **strengthening loyalty to the company**.

Our people strategy is based on five main pillars

Employee Experience

Diversity & Inclusion

Data & Analytics

Leadership & Learning

Corporate Culture

Our Guiding Principles

Customer first
We are relentlessly focused on the need of our customers.

Simplicity
We take action and learn from our mistakes.

Ownership
We empower each other to take responsibility.

Integrity
We keep our promises.

Community
We collaborate beyond conventional boundaries.

Concepts related to our employees

... to support the company strategy and to be seen as an attractive employer.

Labour & Human Rights

A safe and discrimination-free working environment

Inclusion, diversity & equal opportunities

Equal Opportunities

Principle of equality and equal pay

[UNIQA Justice, Equality, Diversity & Inclusion Strategy](#)

Training & Development

Performance & Talent Management

Leadership Programmes for a positive management culture

Employee Engagement

Employee satisfaction

Dialogue with employees (employee surveys)

Dialogue with the Works Council

Targets related to our employees

Best employer for high-performing employees

Employee Satisfaction Index
4.5 stars (out of 5)

Engagement Index
4.5 stars (out of 5)

- **Target: Rating 4.5 out of 5 stars until 2028**
- The target contains two KPIs
 - Employee Satisfaction Index
 - Engagement Index
- **Calculation:** Based on the eight stages of the employee journey: "I get hired," "I am onboarded," "I am working," "I am engaged," "I am learning," "I am achieving my goals," "I am changing my roles," and "I am rewarded". These stages are evaluated as part of the twice-yearly employee surveys.
- Up to and including 2024 the **EX (Employee Experience) Index** was measured (2023: 3.8 stars, 2024: 4.0 stars)*

- **Starting in 2025**, the "I am engaged" stage will no longer be included in the overall score but will be reported as a separate metric: the Engagement Index with a target of 4.5 out of 5 stars. This will transform the EX into the Employee Satisfaction Index with a target of 4.5 out of 5 stars.

Narrowing the adjusted gender pay gap

- The adjusted gender pay gap measures the average wage difference between men and women. It considers factors such as professional experience, qualifications, and position.
- **Adjusted Gender Pay Gap 2024:** 3.1% (reduction of 0.1%). The target for 2024 was thus achieved.

Narrowing the adjusted gender pay gap

	Baseline value and base year	Target value
Time horizon: mid-term (2024)	4.0% in 2023	3.2%

Justice, equity, diversity & inclusion

Seven overarching targets of the UNIQA Group D&I Strategy

- 1 Equal pay for work of equal value
- 2 Promoting equal opportunity by increasing the percentage of women in managerial roles
- 3 Improving generation management
- 4 Promoting work-life balance
- 5 Leveraging the internationality and cultural diversity of the 17 countries in which UNIQA operates as a strength
- 6 Enhancing inclusion and support of persons with disabilities
- 7 Respecting the sexual orientation and identity of every individual

Oberste Führungsebene nach Geschlecht	Head count	%
Male	541	60.6
Female	352	39.4
Total	893	100.0

Narrowing the adjusted gender pay gap	Baseline value and base year	Target value
Time horizon: short-term (2024)	4.0% in 2023	3.2%

Employees by age	Head count	%
Employees < 30 years	2,647	16.15
Employees 30-50 years	9,740	59.41
Employees > 50 years	4,007	24.44

For more information:
[UNIQA Diversity & Inclusion Strategy](#)

Engagement of the UNIQA Group 2024

Labour & Human Rights

- Safe and discrimination-free working environment as a priority
- Clear guidelines through a Code of Conduct and D&I strategy
- Whistleblowing platform for reporting violations
- Mandatory e-learning on equal treatment in Austria.

Diversity & equal opportunities

- Promotion through training, structured talent management, and targeted succession planning
- Mentoring program (since 2021 in Austria)
- Reverse mentoring program (since 2021 in Austria and SEE countries, 2025: other countries)
- Flexible working models, such as job sharing and part-time management models
- Salary simulation tool to analyze adjustments and specifically reduce the gender pay gap

Inclusion – people with disabilities

- Project „UNIQA Ability“: Job shadowing and internships (pilot phase: 2024 in Austria and Poland, medium-term: other countries)
- Publication of all job openings in Austria on myAbility (for one year)
- Awareness-raising measures
- Inclusive job postings
- Accessibility improvements

Training & Development

Learning strategy is based on the **three pillars**:
Offer, Enable and Optimism

Comprehensive learning opportunities
to ensure all the necessary skills to achieve
your goals

Introduction of a learning management system
with customised learning paths & gamification

From 2025

Engagement in the UNIQA Group 2024

Mandatory training for all employees

- Code of Conduct as part of annual compliance training
- Data protection training every two years or upon new hire
- Annual cybersecurity training

Management Training

- Leadership programs to promote a positive leadership culture and practical leadership skills
- Training on "Unconscious Mind, Inclusive Leadership"
- Trial of a university course on sustainability in the financial sector for managers in the retail sector

Average number of training hours per employee by gender

	hours / employee
male	20.95
female	16.96
total	18.52

The average number of training hours is calculated by dividing the total number of training hours completed by the number of actively employed employees as of December 31, 2024. This includes both mandatory and voluntary training.

Employee Engagement & Employee Satisfaction

How we promote our employee satisfaction

- ✓ Focus on **continuous communication** with employees
- ✓ Employee surveys based on the **eight stages of the employee journey**
- ✓ **Employee surveys:**
 - Since 2023: **short pulse checks twice a year**
 - A large, **comprehensive employee survey** is conducted every two years
 - 2024 more than **500 measures** were derived and implemented from these surveys
- ✓ **A variety of offers and activities** to promote cultural change
- ✓ According to local laws: Representation of employees by **works councils or trade unions** in all UNIQA Group companies

Employee Engagement: UNIQA Sustainability Network

Through the **UNIQA Sustainability Network** in Austria, employees have the opportunity to actively engage, to further their education through workshops and webinars, to exchange ideas with like-minded people, to contribute their own ideas and thus to exert a direct influence on the company's sustainability ambitions.

Data Protection & Cybersecurity

The UNIQA Group, as an insurance company, processes a large volume of data as part of its business operations. Data protection and cybersecurity play a particularly important role in this context.

To ensure the protection of personal data – a fundamental right – processes and policies have been implemented that meet the needs of employees and customers.

Data Protection

Measures

- The handling of personal data is subject to a wide range of regulations:
 - EU General Data Protection Regulation (GDPR)
 - EU Artificial Intelligence Act (AI Act)
 - UN Global Compact
- Internal data protection management system
- Group-wide applicable data protection management policy
- Internal data protection management standard
- Internal data protection risk management

Three-Lines-of-Defence-Prinzip

The management of each Group company is responsible for compliance with all data protection regulations and is supported in this by the operational data protection organisation. This organisation comprises the respective data protection officers and data protection coordinators.

Compliance with data subject rights

- Establishment of an email address for inquiries regarding data subject rights in data protection
- Data protection-compliant electronic complaint management system
- Reporting of compliance or legal violations: via email, mail, personal contact with the Compliance Team, or the UNIQA Whistleblowing Platform

Cybersecurity

Ambition: constantly minimising cyber risk and increasing cyber security

Measures

- The UNIQA cybersecurity concept is aligned with legal and regulatory requirements:
 - EU General Data Protection Regulation (GDPR)
 - EU Digital Operational Resilience Act (DORA)
- Crisis management framework
- UNIQA Group Cybersecurity Strategy & Cybersecurity Action Plan
 - Proactive measures to prevent and protect against cyberattacks
 - Network security, automated threat detection, data backup and recovery plans
- Resilience Management System to strengthen resilience to cyber threats
- Business Continuity Management (BCM) to ensure the continuity of critical business processes
